AT A GLANCE

Experience: 3+ Years

Global Enterprise Accounts: 5

Offer Conversion: 37% Gain

Offer-to-Joining Ratio: 90%

Interviews Conducted: 2,000+

Time-to-Fill Improvement: 31% Faster

Cost-per-Hire Savings: 21%

PROFESSIONAL SUMMARY

Full-cycle recruiter with 3+ years running end-to-end, candidate-first hiring across IT, Cloud (AWS, Azure), SaaS, Sales, Consulting, and Telecom mandates for 5 global enterprise accounts. Closed 250+ hires and ran 2,000+ structured interviews at a 90% offer-to-joining ratio, using outbound sourcing, scorecards, and Greenhouse/Workday to keep pipelines clean and funnels fast. Known for building startup-style hiring processes from scratch when no playbook exists, including closing hard-to-fill, niche senior technical roles independently. Thrives in high-growth, fast-moving environments; open to relocate as per the requirements.

KEY HIRING INITIATIVES

Passive Niche Sourcing & Senior Level Pipeline — Solution Architects

- **Challenge:** Extended hiring cycles (40 days) and shallow talent pools stalling delivery of senior Solution Architect mandates for a global enterprise account.
- **Action:** Deployed advanced Boolean strings and proactive market research across 4+ job boards; built ongoing relationship management cadences with passive candidates; partnered with business leaders to sharpen evaluation criteria and compress timelines.
- **Outcome:** Time-to-hire reduced from 40 to 28 days (30% improvement); offer-to-interview ratio improved 38%; offer-to-joining ratio sustained at 90%; all mandates delivered on SLA.

Recruitment Funnel Optimisation & ROI Recovery

- **Challenge:** A 42% post-technical round drop-off was inflating cost-per-hire and producing inconsistent pipeline quality across service lines.
- **Action:** Conducted end-to-end funnel audit; introduced pre-screening assessments, early compensation benchmarking, and ROI-focused stakeholder TAT tracking; presented recruitment analytics to senior leadership to secure process change approval.
- **Outcome:** Screening-to-interview ratio improved from 1:5 to 1:3; cost-per-hire reduced 21%; offer-to-interview ratio boosted 30%; overall hiring productivity increased 35% within two quarters.

EXPERIENCE

Associate Lead, Talent Acquisition
Infosys Limited, Bangalore

May 2022 - April 2025

- Elevated offer conversion 22 points (60% to 82%) as measured by scorecard-driven, structured closing conversations across 250+ hires spanning Sales, Business, IT, Cloud, and Niche Technical mandates.
- Recovered recruitment ROI as measured by a 21% cost-per-hire reduction and 35% productivity gain within two quarters by auditing the funnel and introducing pre-screening assessments, scorecards, and TAT tracking.
- Reduced time-to-fill 31% (35 to 24 days) as measured by improved fill rate across 25+ concurrent Pan-India requisitions by combining talent mapping, Boolean search, and outbound sourcing across Naukri, Indeed, Shine, FoundIT, Greenhouse, and employee referrals.
- Delivered 60+ hires for Cloud infrastructure roles (AWS, Azure) as measured by a 25% improvement in fill rate by partnering with hiring managers to build technical scorecards and sharpen evaluation criteria.
- Tripled diversity shortlists from 12% to 31% as measured by standardized inclusive slate guidelines designed and rolled out across all active mandates.

- Grew referral-sourced hires to 21% of total offers as measured by redesigning and actively promoting the employee referral program company-wide.
- Elevated team-wide qualified applicant volume 23% as measured by mentoring and upskilling 3 junior recruiters on outbound Boolean sourcing and competency-based interviewing.
- Lifted candidate satisfaction 85% as measured by owning the end-to-end candidate experience and standardizing interviewer feedback loops and scorecards.
- Closed 275+ offers with zero compliance escapes as measured by coordinating reference checks and background verification with vendor and onboarding teams.
- Cut leadership reporting effort 40% as measured by building real-time KPI dashboards across 30+ requisitions that surfaced pipeline risk early.
- Scaled qualified applicant volume 20% as measured by 100% audited ATS compliance across 50+ requisitions using Greenhouse, Workday HCM, and INTAP.
- Delivered 100% SLA compliance with zero missed commitments as measured by partnering with hiring managers and HRBPs across 5 global enterprise accounts to translate workforce plans into outbound sourcing strategy.

Career Break

April 2025 - Actively Interviewing

- Remained active in the talent acquisition field by designing AI-enabled sourcing frameworks and analyzed recruitment funnels to identify where candidates drop off and built dashboards in Power BI to track hiring metrics like time-to-fill and offer conversion. Used AI tools (Claude, Gemini) to speed up sourcing, writing sharper outreach messages, drafting Boolean search strings, and summarizing candidate screening notes faster.
- Actively interviewing for Recruiter/Senior Recruiter roles.
